### Information Security Program Compliance Services for Independent Insurance Agents

*A COMPLETE, TURN-KEY Solution to your Information Security Program Requirements.*

#### The Burden of Compliance

Information security is much more than a passing fad. It is the law. Since 1996, numerous legislative actions at the state and federal level have resulted in laws designed to protect the privacy of consumer personal information.

HIPPA, Sarbannes-Oxley, Gramm-Leach-Bliley, FACTA. Like it or not, these laws impact the way that you do business, and require that insurance agents meet the specific standards defined. Regardless of the size of your agency, you are affected by these regulations, as well as state-specific privacy regulations.

The burden of compliance can be daunting, and is an unwelcome distraction from running and growing your business. But there is an alternative.

#### A Turn-Key Solution

To help you meet these requirements, The Stoeffler Group offers a complete solution to your information security needs. We start with an in-depth analysis and risk assessment of your current information security procedures and standards. We fully document our observations and create a risk analysis that clearly identifies those areas that compromise the safety and security of your data, and create an easy-to-follow checklist to facilitate compliance.

We create a tailored information security program document that incorporates the observations and findings of the risk analysis, along with all necessary supplemental documentation. All information and findings are incorporated into a clear, concise document that meets all applicable legal requirements.

We support the implementation of your information security program through on-site training of your personnel, and provide you with updates for one full year from the date of the initial assessment.

#### Start-to-Finish Compliance Services

Our solution includes everything that you need to bring you into compliance at a price that you can afford. We provide the following:

- ◇ *A comprehensive on-site analysis of your physical and IT security arrangements.*
- ◇ *Extensive testing of your computer security, anti-virus, and firewall configuration.*
- ◇ *Preparation and generation of a comprehensive risk analysis.*
- ◇ *Preparation and generation of the required Information Security Program tailored to your business.*
- ◇ *Preparation of all required documentation, including privacy policy, non-disclosure agreements, IT acceptable use policies, and more..*
- ◇ *Training for your employees that meets or exceeds all applicable regulations.*
- ◇ *Continuing updates for 1 year from the initial evaluation date.*
- ◇ *Access to on-line documentation and forms templates.*

Only The Stoeffler Group offers this complete approach to information security compliance for a flat fee.

## The Stoeffler Group ISEP Model

---

The Information Security Evaluation Program (ISEP) model is based upon real-world practical application of information security protocols in the small business environment. We predicate our model on the fact that most small businesses do not have dedicated security or IT personnel.

Our ISEP materials are designed to be easily implemented and maintained in a small-office environment without hyper-tasking your already busy staff. Our training is clear and concise, and we supply all printed material to ensure the maximum benefit for your investment. The documentation of our work product is provided in both hard and soft copy formats to allow you maximum flexibility in updating and maintaining compliance.

Our commitment to your needs continues beyond the generation of your risk assessment and information security program documentation. We provide ongoing updates and information, as well as access to a library of documentation via our web site.

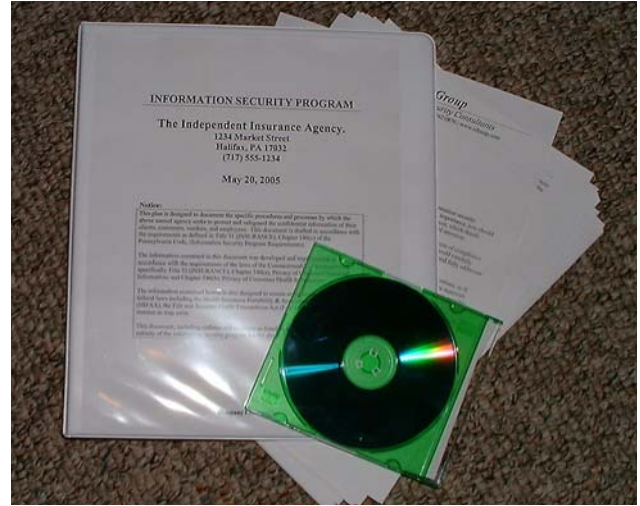

We understand the unique needs of your business. We have been providing IT consulting services to independent insurance agents since 1988. Our consultants have direct experience in conducting security evaluations for businesses of all sizes. From start to finish, it is our goal to provide you with the maximum value for your dollar and to allow you to maintain your focus on serving your clients.

**Our assessment of your information security goes well beyond a tacit review of in-house computer systems.**

## About The Stoeffler Group

---

We are a professional consulting group comprised of experts in the area of computer networking, applications development, and security issues. Our team has direct experience in providing information and physical security to corporate and government clients nationally.

The Stoeffler Group consulting team has supported the IT and data processing needs of independent insurance agents in Pennsylvania since 1988. We developed our ISEP model based upon our knowledge and experience in this market.

In addition to the ISEP program, The Stoeffler Group provides Information Technology consulting, network and applications integration services, web hosting and development, physical security consulting and services, computer and data forensic services, due diligence and litigation support services.

We have affiliate offices in Halifax, PA and Mt. Prospect, IL. We serve Pennsylvania, New Jersey, Ohio, Maryland, and Illinois. Please call or visit our web site for more information about our services, or to join our professional services team.
